

EVS Guaranteed-to-Clean!

The high-quality, dry-erase EVS™ cleans so effectively, it even withstands the accidental use of permanent markers. Here are some “Dos and Don’ts” to ensure the quality of your EVS.

Dos	Don'ts
<ul style="list-style-type: none"> Solvent (Ketone) based dry-erase markers such as EganMarkers and Expo Dry Erase Markers 	<ul style="list-style-type: none"> Do not use Low odor water-based markers like Expo2. These take longer to dry, leaving behind a smudgy film when erased.
<ul style="list-style-type: none"> Use EganCloth to trap dry erase dust in the micro-fibers and maintain a clean surface. 	<ul style="list-style-type: none"> Do not leave EVS dusty and dirty as this can build up to a stubborn film that will require a thorough cleaning.
<ul style="list-style-type: none"> Remove all dry-erase markings from surface with an EganCloth before applying ammonia based spray glass cleaner. 	<ul style="list-style-type: none"> Do not spray the ammonia based glass cleaner with markings on surface. Remove all markings before cleaning.
<ul style="list-style-type: none"> Regular cleaning with an ammonia based spray glass cleaner and an EganCloth will prevent dirt and film buildup, and remove residue, that can impede it's performance. 	<ul style="list-style-type: none"> Do not use a non-ammonia based glass cleaner when cleaning as it may leave a residue.
<ul style="list-style-type: none"> Use isopropyl rubbing alcohol to remove stubborn marks. 	

Maintaining Versa Surfaces—Dust Free and Clean

		
Use the EganCloth to remove dry-erase markings. Day to day use may cause a build up which can be removed with an ammonia based glass cleaner.	The EganCloth traps dry-erase dust, keeping it on the cloth and off hands, clothing, walls and carpets.	Permanent marker cleans off with a scribble of EganMarker, wait a minute, then use an EganCloth to clean. Stubborn marks may be removed with isopropyl rubbing alcohol.
